

CALIFORNIANS FOR POPULATION STABILIZATION

Let's Do Something About The State Of Immigration.

Radio Commercial: “Bakersfield” Script

Announcer: *(Coughs several times, clears throat)* Excuse me. The air here in Bakersfield is killing me. In fact, that’s what I want to talk to you about.
(Coughs again)

Did you know Kern County has the second most ozone-polluted air in the U.S.? That two out of three summer days in Bakersfield are dangerous for asthmatic kids? *(Coughs again)* That studies show smoggy air is damaging our children’s lungs and ozone pollution can cause all kinds of ailments and can lead to premature death?

Now, let me connect the dots for you. *(Coughs)* The air quality problem is caused mainly by too many cars and trucks—all driven by people. We have too many people thanks to years of mass immigration. More than 90% of California’s population growth is from immigration and births to immigrants. So, if we’re going to fix our air, we’ve got to fix immigration.

We’re Californians for Population Stabilization and we stand for cleaner air and a healthier environment through a common sense policy on immigration and growth. Visit our website at caps web dot org. Or call 805-564-6626 to join the fight to get population growth under control. *(Goes into a coughing frenzy to end.)*
